Kansas Hay Market Report

Ground/Grinding alfalfa movement: Southwest/South Central
Tonnage: 9,760/9,414 Last week: 7,423/7,232 Last year: 7,874/3,614

What a difference a year makes! Snow, cold and damp weather was the norm a year ago, while this year Kansas is experiencing sunny skies and mild temps. Hay market trade is moderate, demand was slow to moderate, and prices remain steady, as hay producers continue to report that there has been an increase hay movement. The one thing we could use would be a little rain. According to the US Drought Monitor the west-central region of Kansas saw the expansion of abnormal dryness (D0) and the southwest saw small degradations in moderate (D1) and severe (D2) drought as precipitation deficits continue to build. The Kansas Forage and Grassland Council is having their annual conference on December 10 in Wichita. Visit their website at www.ksfgc.org for more information and registration. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: www.hayexchange.com/ks.php.
