Kansas Hay Market Report

Ground/Grinding alfalfa movement: Southwest/South Central
Tonnage: 10,342/5,131 Last week: 8,423/5,320 Last year: 7,748/5,976

Hay market trade slow; Prices steady. Most producers report demand as light with a few isolated increases in deliveries and the supply of hay is moderate. In addition, the majority of producers have been busy combating the insects. K-State Entomology reports that weevil activity has significantly increased with in the last week, particularly in the north central region. Although the cold weather will slow down the weevils feeding activity, it won't be cold enough to kill very many larvae. According to the U.S. Drought Monitor, west-central Kansas saw minor improvements in areas of Abnormally Dry (D0) conditions, while drought-related conditions deteriorated in southwestern Kansas, where an area of Severe Drought (D2) worsened. Abnormal dryness (D0) decreased to 3 pct, moderate drought (D1) decreased slightly to 3.7 pct, and severe drought (D2) increased to 2.4 pct. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: www.hayexchange.com/ks.php.
