Direct Hay Weighted Average Report for week ending 8/21/2020

Volume			
	This Week	Last Reported (8/10/2020)	Last Year
Tons:			
Hay	20142	22078	0
Straw	320	810	0
Total	20462	22888	0
Bales:			
Hay	199	25	0
Straw	0	20	0
Total	199	45	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Hay market trade slow, prices steady and demand remained light. After weeks of on-again/off-again rain showers, everyone is taking advantage of the nice dry weather and baling up that hay. Although reports have been varied, most growers, this past week, were able to get hay put up dry. Third cutting is making more tons than the 1st and 2nd cuttings, but there has also been a lot of pigweeds included in some bales. There were 6.6 days suitable for fieldwork, according to NASS and topsoil moisture supplies rated 10% very short, 33% short, 55% adequate, and 2% surplus. Pasture and range conditions rated 4% very poor, 12% poor, 37% fair, 41% good, and 6% excellent. The US Drought Monitor states that abnormal dryness (D0) remained around 17.5 pct, moderate drought (D1) decreased to 12 pct, severe drought (D2) remained steady at 4 pct, and extreme drought (D3) remained less than .05 pct. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: www.hayexchange.com/ks.php.
