Hay market trade slow and prices remained steady for all hay types in all regions. Hay movement increased slightly over the past week but remains sluggish. Fall officially arrived on the 22nd, but you would not have known that on Saturday. Most areas reached into the mid to upper 90's even setting several high temperature records. Haying and harvest continue to keep all busy with nearly 29% of corn harvested and 10% of beans, according to the NASS crop progress report. Drought conditions continue to plague western Kansas and the 10-day forecast does not look favorable. According to the US Drought Monitor, abnormal dryness (D0) increased to 25 pct, moderate drought (D1) increased to 5.5 pct, severe drought (D2) remained at 3.5 pct, and extreme drought (D3) remained at .65 pct. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: www.hayexchange.com/ks.php.
