****DUE TO LAST WEEK'S VETERANS DAY HOLIDAY, THE FOLLOWING IS A REPRINT OF THE NOVEMBER 10TH REPORT. NEXT PUBLISHED REPORT WILL BE TUESDAY NOVEMBER 24TH, 2020.****

Hay market prices were steady while demand and amount of hay traded backed off a bit. Most contributors stated that although sales and inquiries slowed, there is hay around, with good quality hay becoming harder to find and folks are holding on to it. For those moving hay, it sounds like many trades have been out of state with loads moving to Texas, Oklahoma, Colorado and back east. According to US Drought Monitor for the week of November 3rd, Kansas missed out on precipitation during late October, thus some degradations were made there. Moderate drought (D1) was extended across northern Kansas and into southeastern Nebraska. Severe drought (D2) was slightly expanded into northwestern Kansas and southwestern and northeastern Nebraska. In contrast, heavy precipitation (1-4 inches) across southern Kansas, effectively allowed a 1-category improvement across the southern third of the state. The middle third of Kansas remained unchanged. Abnormal dryness (D0) decreased to 38%, moderate drought (D1) increased to 35%, severe drought (D2) increased to 8.5%, and extreme drought (D3) remained at just over 1.5%. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: www.hayexchange.com/ks.php.

***Prices are dollars per ton and FOB unless otherwise noted. Dairy alfalfa prices are for mid and large squares unless otherwise noted. Horse hay is in small squares unless otherwise noted. Prices are from the most recent sales. *CWF Certified Weed Free
